

DAHLE GUILLOTINES

PROFESSIONAL GUILLOTINE - MODEL 124

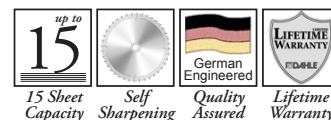

Safety is a top priority when Dahle designs its paper cutters and this Professional Series Guillotine is no exception. A protective guard was added that also doubles as a paper clamp. This guard not only protects your fingers from being in the wrong place, but when it's depressed, will securely hold your work in place. The blade on this guillotine also features an innovative spring system that will hold the blade at any angle and prevent it from flying up or falling down accidentally.

Dahle's Professional Guillotine model 124 is German engineered for heavy-

er applications. It features a ground self-sharpening blade that maintains a perfectly honed edge every time it is used. It offers a cutting capacity of up to 10 sheets of paper at a time and is the perfect tool for cutting paper, card stock, and illustration paper.

Available in a 24" cutting length, Dahle's 124 Professional Guillotine is the preferred choice of professional photographers, print shops and graphic design agencies.
