

For Immediate Release

Dahle Offers Complete Solution For Large Format Trimming *German Engineered For Safety and Accuracy*

Peterborough, NH, January 1, 2009 –

Rolling Trimmers are the new generation of paper cutters. Designed for safety and accuracy, the round cutting blade is encased in a protective housing that virtually eliminates the chance of personal injury. The rotary action of the blade allows the trimmer to cut in either direction and sharpen its blade along the way. It's this self sharpening action that produces a clean burr-free cut and guarantees many years of smooth precise cutting.

Dahle now offers a line of large format rolling trimmers designed for performance and accuracy. This Professional Series offers a cutting capacity of up to 14 sheets (model 556 S) or 12 sheets (model 558 S) of paper at a time. These commercial grade trimmers feature a self sharpening blade and automatic clamping system to securely hold your work in place. A metal stand with paper catch offers a stable and secure mounting solution for the trimmer. This stand also maximizes floor space while providing an optimal and comfortable height for trimming. This trimmer is the perfect solution for cutting oversize paper, large format images, and press sheets.

“These professional trimmers offer safety and extreme accuracy for your large format printing,” said Chris Jackson, Marketing Manager, Dahle North America, Inc. “Why trust your images, or reputation with anything less?”

Dahle's Professional Series of large format rolling trimmers is available in two sizes. The 556 S has a cutting length of 37" and the 558 S cuts up to 51". They are priced at \$899 and \$1,049 respectively. These trimmers are manufactured in Germany and are the preferred choice among professional photographers, print shops and graphic design agencies throughout the world.

Dahle North America, Inc. is a fully integrated manufacturer of innovative office products and equipment with a brand name recognized for quality and precision. Dahle markets more than 300 products, including paper shredders, paper cutters and trimmers, scissors, pencil sharpeners, and Novus staplers.
