Dahle Office Shredders: ***Keeping Your Information Private***

Peterborough, NH, September 1, 2011–

In this age of information, it is becoming increasingly more difficult to keep your business and personal information private. Dahle offers a solution with their complete line of Office Shredders. These shredders are designed for medium size offices and equipped with a 10 ¼" feed opening.

Each Dahle Office Shredder is chain driven to provide slip free power to the cutting cylinders. These cylinders are milled from a solid block of German Solingen Steel and come with a lifetime warranty from the manufacturer (excludes high security machines). Rubber shock mounts separate the mechanicals from the wooden cabinet and provide whisper quiet operation in order to prevent the disturbance of normal office operations.

"With the widespread use of network printers and fax machines, it is important to have a powerful shredder located nearby to easily dispose of this information," said Scott Prokop, VP, Dahle North America, Inc. "Its power and storage capacity allows the shredder to be centrally located and accommodate the shredding needs of even the busiest office environment."

Energy conservation continues to be a top priority at Dahle. Dahle professional shredders are no exception. The World's only line of shredders with built-in SmartPower Energy Management System, Dahle Professional shredders operate using the intuitive SmartPower Energy Management System. This multi-stage system integrates "green technology" by reduces power consumption after ten minutes of sitting idle (sleep mode), and completely powers down to a 0% energy draw after an additional 20 minutes of inactivity. The SmartPower System will appeal to those interested in conserving energy as well as reducing electrical costs.

The easy-to-use command dial controls all of the machine's functions and notifies the user when to change the shred bag and if the door is ajar. This shredder offers fully electronic capabilities including such safety features as Automatic Shutoff when the cabinet door is open, and Auto Reverse to prevent an overfeed. It's these state-of-the-art features that save energy, time and provide a worry free environment.

Dahle North America, Inc. is a fully integrated manufacturer of innovative office products and equipment with a brand name recognized for quality and precision. Dahle markets more than 300 products, including paper shredders, paper cutters and trimmers, scissors, pencil sharpeners, and Novus staplers.
