## **Dahle Offers New 560 Professional Guillotine:** ***Superior Cutting and Safety For Any Application***

*Peterborough, NH, March 1, 2015 –*

A durable, sharp cutting blade is the signature mark of a Dahle, and the new 560 Professional Guillotine carries on the tradition. This lever style trimmer features a machine ground, self-sharpening blade that maintains a perfectly honed edge every time you cut. It features a 13" cut length and will trim up to 25 sheets of paper at a time.

The new 560 Professional Guillotine features an integrated safety shield. This acrylic guard covers the blade throughout the entire cutting range, and also doubles as a paper clamp. For additional safety, the 560 includes an innovative spring system that holds the blade at any angle, and prevents it from falling down unexpectedly.

"The new 560 offers a more substantial cutting blade than the 533 and 534 guillotines," said Chris Jackson, Marketing Manager, Dahle North America, Inc. "With the added benefit of the safety guard, this trimmer is perfect for use in just about any setting."

Dahle North America, Inc. is a fully integrated manufacturer of innovative office products and equipment with a brand name recognized for quality and precision. Dahle markets more than 300 products, including paper shredders, cutters and trimmers, scissors, pencil sharpeners, and Novus staplers.
