Gov't Credit & Purchase Cards accepted

About Dahle

In 1930, Wilhelm Dahle invented and began manufacturing steel discs for pencil sharpeners. By the early 1960's, Dahle was the world leader in pencil sharpening, and began developing several innovative safety devices for their guillotine paper cutters. By the early 1980's, Dahle offered a complete line of professional office products to include a new type of security device, the paper shredder. Currently Dahle offers a complete line of NSA approved High Security paper shredders including the world's only shredders with an integrated fine dust filtration system.

Our Mission

Dahle North America, Inc. is committed to providing innovative office equipment that ensure the security and productivity of the U.S. Government. All Dahle products are backed by our determination to exceed the highest levels of customer service and support.

Novus Staplers

Since 1949, the Novus name has been synonymous with quality and innovation. We offer a complete range of sizes that exceed even the most serious demands for quality and performance. Engineered and developed in Germany, Novus products are factory tested before release to ensure complete customer satisfaction.

Professional Shredders

Dahle shredders are manufactured in Germany by Dahle Bürotechnik GmbH using the latest technology and finest materials. Each component is manufactured and assembled from over 80 years of experience. Dahle shredders use solid cutting cylinders milled from German Solingen steel and are guaranteed to last a lifetime. Rubber shock mounts, chain driven cylinders, and a thermally protected motor, produce a quality shredder and peace of mind knowing your machine will provide many years of trouble free operation.

Dahle continues to forge the future of document shredding. The DAHLE CleanTEC® shredders are a dramatic accomplishment of design, safety, and special features never seen before. Features like Fine Dust Filtration, Safe Technology, and Electronic Sensing Protection (ESP) continue to keep us one step ahead of the competition.

Desktop
