MY twin arm + MY tab

### More Space

Available workspace is at a premium in today's work environment. With business conducted on multiple monitors, tablets, and smart phones, it can be difficult to keep things organized and stay productive. A MY system from Novus provides a creative solution for elevating and positioning your viewing devices, to keep your personal workspace functioning in harmony.

### Ergonomic

The Novus MY system makes it easy to adjust your workspace so that it's ergonomically correct for your physical needs. You can easily change the tilt/turn angle, height, and distance of your viewing devices to fit your setup and personal preference. With immense flexibility, a MY set will greatly reduce physical distress, and improve your overall comfort.

### Increased Productivity

There's no need to continually pick up and put down your tablet throughout the workday. By adding a MY tab to your set, you can streamline your workflow and view all of your devices seamlessly. Need to collaborate? Add a Novus MY arm and share two monitors simultaneously. With MY, each set can easily be configured to accommodate your busy lifestyle.

## MY BASE OPTIONS

MY sets are offered with a variety of attachment options for multiple work surfaces. Each MY base is made from

anodized aluminum, and provides a solid foundation for your viewing device. Due to their higher weight

capacities, the MY twin fix and MY twin arm are not available with the SlatWall or Wall Rail base options.

**System Clamp**

-13 ¾" MY Column  
.55"-1.58" Edge clamp
